

PRATYUSH PANDEY

B.E. COMPUTER SCIENCE (CYBER SECURITY) | FULL STACK DEVELOPER

PROFILE

Passionate Full Stack Developer and Cyber Security enthusiast with hands-on experience in MERN stack, Spring Boot, and Angular. Committed to building secure, scalable web applications with strong fundamentals in networking, operating systems, and ethical hacking. CGPA: 9.5.

INTERNSHIP

Coincent.ai, India Jul 2025 - Aug 2025 | Remote

Cyber Security Intern

- Built strong foundation in cybersecurity concepts, Linux commands, and system security practices.
- Gained practical experience using Kali Linux and security tools for analysis and problem-solving.
- Developed cybersecurity reports and awareness content on real-world threats and solutions.

Wave Mind Solutions Jul 2026 - Jan 2027 | Remote

Web/App Development Intern

- Assisting in website and application development on real-time projects and assigned tasks.
- Collaborating with the team to meet deadlines and maintain code quality with proper documentation.
- Gaining real startup exposure with opportunity for future paid role based on performance.

PROJECTS

TnPConnect | Spring Boot 3.5, Angular 19, PostgreSQL Mar 2025 - Jun 2025

Live Demo ■ | GitHub ■

- Developed an AI-driven placement ecosystem for automated career guidance, powered by Google Gemini.
- Designed scalable Spring Boot backend using PostgreSQL and JWT-based RBAC to secure data and manage placement drives.
- Deployed frontend on Netlify and backend on Render with custom UI featuring 3D skill visualizers and targeted notifications.

AIGPT Chat Application | MERN Stack Aug 2025 - Oct 2025

Live Demo ■ | GitHub ■

- Built a full-stack AI chat application using React, Node.js, and MongoDB to manage chat threads and conversation history.
- Implemented secure JWT-based authentication for user signup and login.
- Designed RESTful APIs for chat and message management with responsive markdown-supported interface.

Wanderlust - Full Stack Airbnb Clone | MERN Stack Jul 2025 - Aug 2025

Live Demo ■ | GitHub ■

- Developed a property booking platform with authentication, listing management, and reviews.
- Built RESTful APIs for CRUD operations on property listings, bookings, and user reviews.
- Designed responsive frontend using React.js with MongoDB backend for listing storage and booking workflow.

TradeVista - Stock Trading Dashboard | MERN Stack Jan 2026 - May 2026

Live Demo ■ | GitHub ■

- Developed a simulated trading dashboard for portfolio tracking, analytics, and order management.
- Built RESTful APIs using Node.js and Express.js to handle simulated trading and portfolio data.
- Designed responsive React interface for interactive portfolio analytics and stock visualization.

EXTRACURRICULAR

OWASP TCET, Thakur College of Engineering and Technology 2024 - 2025

- Creative Team Member - Contributed to content and design for the OWASP Bulletin, strengthening community engagement.

TCET Green Club, Thakur College of Engineering and Technology 2023 - 2026

- Creative Team Member - Developed creative content for the Nisarag Magazine, promoting sustainability through impactful storytelling.

COURSEWORK / SKILLS

- Data Structures & Algorithms
- Web Development
- Computer Networks
- Cyber Security
- Object-Oriented Programming (OOP)
- Database Management (DBMS)
- Operating Systems
- Software Engineering
